WORK EXPERIENCE

APPLE | Senior Software Engineer, Vision Products Group — Seattle, WA | December 2022 – Present

- Developed first-party Apple Vision Pro applications, including the newly announced Siri app, Image Playground, and Freeform, designing and implementing immersive 3D interactions optimized for spatial computing.
- Served as acting lead of a 17-engineer team for three weeks to ship the Siri app, delivering all committed work on schedule.
- Independently represented the visionOS Siri app in late-cycle release triage, weighing customer impact against the risk of late changes.
- Co-led the architecture guidelines for a 130+ contributor codebase and served as core reviewer for code quality.
- Joined the iOS and macOS Image Playground team on loan for six months, shipping Apple Intelligence features across three platforms.
- Led product reviews with Human Interface design, product, and partner teams across several organizations.
- Built parallelized Claude Code agent workflows for bug triage, issue tracking, and concurrent development.
- Mentored an intern whose project was selected to Mike Rockwell (then VP of Vision Products Group, now head of Siri).

MICROSOFT | Software Engineer II, Hololens — Seattle, WA | April 2021 – November 2022

- Built holographic 3D visualizations of geospatial and temporal ocean data for National Geographic's *OceanXplorers* (BBC Studios, OceanX, James Cameron) which aired on Disney+ in 2023. Adapted this work into a real-time collaborative tool deployed aboard the OceanXplorer research vessel.
- Rebuilt the device management and data ingestion services as a web app, with REST endpoints serving live data to the interactive visualizer.
- Led the location-based experiences project with Flying Fish Exhibits: a five-year traveling mixed reality museum installation on marine research.

THE WALT DISNEY COMPANY | Software Engineer, Disney Studios — Glendale, CA | June 2018 – March 2021

- Designed and developed two new applications in Disney's asset management ecosystem for managing title and data input metadata, owning UI and integration. Extended file transfer to support folder management.
- Independently built custom ingestion, back-end, and UI support for industry-standard IMF packages.

SKILLS

Languages:	Swift, JavaScript, C#, Python, HTML / CSS, Java, Objective-C
Tools:	Xcode, Git / Fork, cmux, Radar, Mica, visionOS VMs, Unity, Visual Studio, Keynote, Pages, Blender, Illustrator, Photoshop, After Effects, Procreate
Apple Platforms:	SwiftUI, UIKit, Swift Testing, RealityKit, App Intents, WidgetKit, ARKit, Accessibility, Localization
AI:	Apple Foundation Models, Claude API, multi-agent Claude Code workflows, Claude skills and hooks, prompt engineering, structured and streaming output
Web:	React, Redux, Node.js, Angular, MongoDB

PATENTS & PUBLICATIONS

Methods of Facilitating and Interacting with Virtual Workspaces in a Three-Dimensional Environment. Apple Inc., WO2026072224A1, 2026.

Effects of Personalized Avatar Texture Fidelity on Identity Recognition in Virtual Reality. The Eurographics Association, 2017.

EDUCATION

BA Computer Science, Studio Art — Claremont, CA | May 2018
Pomona College — *Cum Laude*
